

## Take Control of Your Health

- 1 COPD is the third leading cause of death in the United States, claiming more than 120,000 American lives each year. More than 12 million have been diagnosed, but another 12 million are likely to have COPD and don't know it.<sup>1</sup>
- 2 It is estimated that about 5 to 10 percent of adults may have COPD with an increase in prevalence with age.
- 3 COPD and related conditions (including asthma) caused 130,000 deaths in 2005.
- 4 Currently COPD is the third leading cause of death behind heart disease and cancer.
- 5 Of the 10 leading causes of death in the United States, COPD is the only one to have increased in frequency over the past three decades.
- 6 With more people being affected by COPD every year, understanding the causes and searching for cures has become increasingly more important.<sup>2</sup>
- 7 Access this same day treatment process utilizing adipose-derived stem/stromal cells to encourage the healing and regeneration potential of your respiratory tissue.

- Treatment time: Estimated 3-4 hours
- Hospital stay: None
- Anesthesia: None

*A Global Elite Membership*  
will provide you with  
immediate access to treatment protocols  
that may effectively improve COPD.

**Take back  
the quality of your life  
in ONE DAY.**
